Journal of Non-Crystalline Solids 121 (1990) ix–xiii
North-Holland

CONTENTS

Preface, M.A. Aegerter vii
Invited lectures viii
Advisory/Organizing committees viii
Sponsorship viii
Contents ix

Section 1. Precursors and sol–gel chemistry

Chemistry of alkoxide precursors (*Invited lecture*)
Mehrotra, R.C. 1
Organometallic sol/gel chemistry of metal sulfides (*Invited lecture*)
Guiton, T.A., C.L. Czekaj and C.G. Pantano 7
A Flory–Stockmayer analysis of silica sol–gel polymerization (*Invited lecture*)
Klemperer, W.G. and S.D. Ramamurthi 16
Preparation of polymetalloxanes as a precursor for oxide ceramics
Abe, Y., T. Gunji, Y. Kimata, M. Kuramata, A. Kasgöz and T. Misono 21
The sol–gel route to molybdenum oxides
Mendez-Vivar, J., A. Campero, J. Livage and C. Sanchez 26
Chemical modification of metal alkoxides by solvents: a way to control sol–gel chemistry
Nabavi, M., S. Doeuff, C. Sanchez and J. Livage 31

Section 2. Gel formation and characterization

Electronic properties of mixed valence oxide gels (*Invited lecture*)
Livage, J., J.P. Jolivet and E. Tronc 35
Kinetic study of gelation of solventless alkoxide–water mixtures
Ramírez-del-Solar, M., N. De la Rosa-Fox, L. Esquivias and J. Zarzycki 40
Hydrous copper oxide gels
Pierre, A.C., T. Nickerson and W. Kresic 45
Quantum chemistry of sol–gel silica clusters
West, J.K., B.F. Zhu, Y.C. Cheng and L.L. Hench 51
Modelling of aggregation kinetics of colloidal silica particles
Bagnall, C.M., L.G. Howarth and P.F. James 56
Reduction of lead migration during drying of a gel
Maeda, H., M. Iwasaki, A. Yasumori and M. Yamane 61
From sol–gel to aerogels and cryogels
Pajonk, G.M., M. Repellin-Lacroix, S. Abouarnadasse, J. Chaouki and D. Klvana 66
Structure and physical properties of V_2O_5 gels containing GeO_2
Hirashima, H. and K. Sudo 68
Correlation between the preparation conditions and the mesoporous texture of titania gels
Quinson, J.F., M. Chatelut, C. Guizard, A. Larbot and L. Cot 72

Formation of SnO_2 gels from dispersed sols in aqueous colloidal solutions
Hiratsuka, R.S., S.H. Pulcinelli and C.V. Santilli 76
Effect of the method of preparation on the texture of TiO_2–SiO_2 gels
Ramírez-del-Solar, M., N. De la Rosa-Fox, L. Esquivias and J. Zarzycki 84
Effect of precursors on lithium containing silicate gels studied by ^7Li nuclear magnetic resonance
Szu, S.-P., L.C. Klein and M. Greenblatt 90
The effect of the conditions of the treatment of gel on the crystallinity of the layered compound zirconium (IV) bis(phosphite)
Garrido, F.M.S. and O.L. Alves 98

Section 3. Conversion of gels to glasses and ceramics

Stress and fracture during drying of gels (*Invited lecture*)
Scherer, G.W. 104
Structural aspects of sol–gel synthesis (*Invited lecture*)
Zarzycki, J. 110
Densification of sol–gel silica: constant rate heating, isothermal and step heat treatments
Klein, L.C. and T.A. Gallo 119
Structural evolution during sintering of optical sol–gel silica
Vasconcelos, W.L., R.T. DeHoff and L.L. Hench 124
Gel to glass transformation of silica
Dumas, J., J. Serughetti, J.L. Rousset, A. Boukenter, B. Champagnon, E. Duval and J.F. Quinson 128
Mechanical properties evolution during sintering of optical sol–gel silica
Vasconcelos, W.L. and L.L. Hench 132
Porous gel–silica, a matrix for optically active components
Noguès, J.-L.R. and W.V. Moreshead 136
A positronium decay analysis of the pore ultrastructure of sintered gel–silica monoliths
Zerda, T.W., W.L. Vasconcelos and L.L. Hench 143
Thermal properties of gel-derived materials of Al_2O_3–SiO_2 system
Iwasaki, M., A. Yasumori, H. Kawazoe and M. Yamane 147
Aluminium sec-butoxide modified with ethylacetoacetate: an attractive precursor for the sol–gel synthesis of ceramics
Babonneau, F., L. Coury and J. Livage 153
Glass-forming ability of a CaO–Nb_2O_5 composition by sol–gel and conventional preparation methods
Chen, A., G.F. Neilson and M.C. Weinberg 158
Kinetics of sol–gel glass formation in the system SiO_2–TiO_2–ZrO_2
Beier, W., A.A. Göktas and G.H. Frischat 163
Some properties of N-containing lithium borate glasses prepared by different sol–gel methods
Krüner, G. and G.H. Frischat 167
Characterization by ^{11}B, ^{23}Na and ^{29}Si MAS-NMR of silicate and borosilicate glasses prepared by the sol–gel procedure
Villegas, M.A., J. Sanz and J.M. Fernández Navarro 171
Structural evolution of sodium borosilicate gel-glasses in metastable immiscibility region
Chang, J., A. Yasumori, H. Kawazoe and M. Yamane 177
Thermal evolution of gels derived from $CH_3Si(OC_2H_5)_3$ by the sol–gel method
Kamiya, K., T. Yoko, K. Tanaka and M. Takeuchi 182

Section 4. Physical and chemical properties of shaped materials

4(a). Aerogels, xerogels and sonogels

SiO_2-aerogels: modifications and applications (*Invited lecture*)
Fricke, J. 188
Characterization of silica gels by infrared reflection spectroscopy
Almeida, R.M., T.A. Guiton and C.G. Pantano 193
Different kinds of fractal structures in silica aerogels
Woignier, T., J. Phalippou, R. Vacher, J. Pelous and E. Courtens 198
Effect of aging and pH on the modulus of aerogels
Hdach, H., T. Woignier, J. Phalippou and G.W. Scherer 202
Aerogel to glass transformation studied by low frequency Raman scattering
Woignier, T., J.L. Sauvajol, J. Pelous and R. Vacher 206
Structural study of silica sonogels
De la Rosa-Fox, N., L. Esquivias, A.F. Craievich and J. Zarzycki 211
Textural characteristics of silica aerogels from SAXS experiments
Lours, T., J. Zarzycki, A.F. Craievich and M.A. Aegerter 216
The use of solution impregnation to dope silica gels with Cd, Se and S
Bagnall, C.M. and J. Zarzycki 221
Fractal characterisation of porous media: a model calculation
Kolb, M. 227

4(b). Glasses

Processing of gel–silica monoliths for optics. Drying behavior of small pore gels (*Invited lecture*)
Hench, L.L. and M.J.R. Wilson 234
Silica glass: preparation and characterization
Ruvolo, Jr., E.C., H.L. Bellinetti and M.A. Aegerter 244
Synthesis of $MgO–Al_2O_3–SiO_2$ glasses from sol–gel process and their thermal expansion
Tsuchiya, T. and K. Ando 250
Spectroscopy and applications of molecules in glasses (*Invited lecture*)
Reisfeld, R. 254
Preparation, processing, and fluorescence characteristics of neodymium-doped silica glass prepared by the sol–gel process
Moreshead, W.V., J.-L.R. Noguès and R.H. Krabill 267
Preparation of Nd-doped silica glasses by the sol–gel method
Fujiyama, T., M. Hori and M. Sasaki 273
Adiabatic nucleation and crystallization of gels
Meyer, E., E.D. Zanotto and M.A. Aegerter 279
Nucleation induced in gahnite-like glasses and xerogels by chromium: a study by laser spectroscopy
Nie, W., G. Boulon, C. Mai, C. Esnouf, R. Xu and J. Zarzycki 282
Elastic and anelastic properties of rare earth phosphate glasses
Carini, G., M. Cutroni, G. D'Angelo, M. Federico, G. Galli, G. Tripodo, G.A. Saunders and Q. Wang 288

4(c). Thin films and coating

Sol–gel thin film formation (*Invited lecture*)
Brinker, C.J., A.J. Hurd, G.C. Frye, K.J. Ward and C.S. Ashley 294

The thickness of sol–gel silica coatings obtained by dipping
Guglielmi, M. and S. Zenezini 303
Preparation and properties of TiO_2–CeO_2 coatings by the sol–gel process
Makishima, A., M. Asami and K. Wada 310
UV highly absorbant coatings with CeO_2 and TiO_2
Sainz, M.A., A. Durán and J.M. Fernández Navarro 315
Dip-coated TiO_2–CeO_2 films as transparent counter-electrode for transmissive electrochromic devices
Baudry, P., A.C.M. Rodriguez, M.A. Aegerter and L.O. Bulhões 319
Preparation and characterization of thin films of TiO_2–PbO and TiO_2–Bi_2O_3 compositions
La Serra, E.R., Y. Charbouillot, P. Baudry and M.A. Aegerter 323
Synthesis of an alumina coating from chelated aluminium alkoxides
Nass, R. and H. Schmidt 329
Thin films of alumino-silicate glasses from gels
Höland, W., P.H. Duvigneaud, E.R. Plumat and W. Vogel 334
Protective glass coatings on metallic substrates
De Sanctis, O., L. Gómez, N. Pellegri, C. Parodi, A. Marajofsky and A. Durán 338
Coating of fluorine-doped ZrO_2 films on steel sheets by sol–gel method
Izumi, K., H. Tanaka, M. Murakami, T. Deguchi, A. Morita, N. Tohge and T. Minami 344
Mechanical properties of sol–gel coatings
Fabes, B.D. and W.C. Oliver 348
Infiltration of glass flaws by alkoxide coatings
Fabes, B.D. and G.D. Berry 357
Electrical conductivity of tin oxide films prepared by the sol–gel method
Maddalena, A., R. Dal Maschio, S. Diré and A. Raccanelli 365
Modelling of ORMOCER coatings by processing
Nass, R., E. Arpac, W. Glaubitt and H. Schmidt 370

4(d). Powders and ceramics

Emulsion synthesis of spherical TiO_2–SiO_2 colloids from metal alkoxides (*Invited lecture*)
Minehan, W.T. and G.L. Messing 375
Spherical silica gels precipitated from acid catalyzed TEOS solutions
Kawaguchi, T. and K. Ono 383
Particle size distribution of spherical silica gel produced by sol–gel method
Masuda, R., W. Takahashi and M. Ishii 389
Light scattering of silica particles in solution
Moreira, J.E., M.L. Cesar and M.A. Aegerter 394
The base-catalyzed hydrolysis and condensation reactions of dilute and concentrated TEOS solutions
Harris, M.T., R.R. Brunson and C.H. Byers 397
Preparation of PZT powders from metal alkoxides
Hirashima, H., E. Onishi and M. Nakagawa 404
Synthesis of cellular inorganic materials by foaming sol–gels
Wu, M., T. Fujiu and G.L. Messing 407
Sol–gel processing by inorganic route to obtain a TiO_2–PbO xerogel as ceramic precursor
Calzada, M.L. and L. Del Olmo 413

4(e). Fibers

Sol–gel processing of insulating, electroconducting and superconducting fibers (*Invited lecture*)
Sakka, S. 417
$PbTiO_3$ ceramic fibres prepared from a sol–gel process as piezoelectric materials
Del Olmo, L. and M.L. Calzada 424

4(f). Composites

Organically modified ceramics and their applications (*Invited lecture*)
Schmidt, H. and H. Wolter 428

4(g). High T_c superconductors

Sol–gel processing of ceramic superconductors (*Invited lecture*)
Kordas, G. 436
Preparation of high-T_c superconducting oxide films in the Bi–(Pb)–Ca–Sr–Cu–O system from stabilized metal-alkoxides
Toghe, N., M. Tatsumisago and T. Minami 443
Bismuth-based superconductors prepared by a solution technique
Dos Santos, D.I., U. Balachandran, R.A. Guttschow and R.B. Poeppel 448

Section 5. Application and prospects

Dielectric and high T_c superconductor applications of sol–gel and modified sol–gel processing to microelectronics technology (*Invited lecture*)
Bagley, B.G., W.E. Quinn, S.A. Kahn, P. Barboux and J.-M. Tarascon 454
Low temperature sensors prepared by the sol–gel process
Strehlow, P. 463
Prospects for sol–gel processes (*Invited lecture*)
Ulrich, D.R. 465

Author index 481
Subject index 486
